## PROFILE

I am a very curious person who showed great skills on logic problems since my childhood along with a strong creativity. Amongst others, this made me start playing go, doing photography, dancing and playing guitar. I then developed a huge interest in IT and everything in its orbit which conducted me to an engineering school. Starting my career as a backend developer, I never ceased to go further in my job. Along with my technical skills, my curiosity, my commitment and my communication skills lead me to become an IT architect in which I can share my thoughts about a bigger pictures.

## WORK EXPERIENCE

### IT architect - AXA France

#### Aubay

Feb 2019 – Ongoing    Paris, France

- Define and document IT solutions based on business needs and architectural context
- Expose and convince architectural and technical teams about IT chosen solutions
- Share my vision about IT governance topics and long term architectural choices

### Application Officer - Euler Hermes

#### Aubay

Jun 2017 – Jan 2019    Paris, France

Working with international teams

- Ensured good health of 2 worldwide front-ends applications, solved incoming issues and lead task forces
- Made technical choices about platform evolution, and coordinated their set-up
- Discussed and defined new process and automatization tools, in the context of setting up agile methods.
- Set up reporting, for business and managing teams

### Technical Leader - AXA Group solutions

#### Capgemini

Jan 2015 – May 2017    Paris, France

Working with international teams

- Analysed existing solution, defined and write documentation of target solution using feedback from business teams (from 6 countries)
- Defined with enterprise architect the new tools specifications to complete existing offer with efficient business solutions
- Defined deliveries process and source versionning, follow Spain development team and coordinates deployments and operations with teams from several countries
- Participated in workshop to move our software infrastructure from On-premise servers to Cloud use

## EDUCATION

### PH125.8x Data Science: Machine Learning

#### HarvardX

Sept 2019 – Nov 2019

### M.S. in Computer Science

#### ENSIEE - french engineering school

Sept 2007 – Aug 2010

### Preparatory class for top engineering schools

#### Lycée Pierre de Fermat

Sept 2005 – June 2007

## STRENGTHS

Resilient

Curious

Creative

Like to plan & leave nothing to chance

Software Development & Algorithms

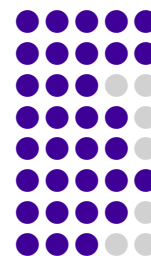

Strong knowledge in database, networks & OS

Process & Tools definition

International project teams coordination

## SKILLS

Problem Solving  
Software Development  
Network & OS  
Data queries  
IT architecture  
International projects  
Teams coordination  
Team management

## Web developer/Consultant

### Self Employed

Nov 2014 – May 2016

Paris, France

Working with international teams

- Technical advise and web development, on my spare time, for small canadian and american business (ex: breezing.com)

Paris, France

Working with international teams

- Wrote technical specifications and developed new features
- Technical management of a french and indian team
- Took care of optimization subjects of the platform and on environment evolution (set up of virtualization, servers and database administration)
- Worked on Software Engineer community core-team for Capgemini, to provide tools and information to the whole community

## Intern Developer

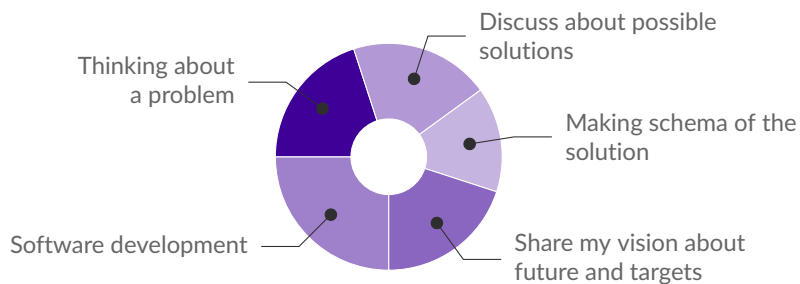

### C-S

Feb 2010 – Jul 2010

Paris, France

- Benchmark virtualization tools and define a technical solution to do automatic deployment and configuration of a software
- Develop the solution and provide it to a project initially using 8 bare-bone servers for their testing set
- Add a front-end for project users to be able to use it very easily

## WHAT I DO AT WORK

## CODING LANGUAGES

Python

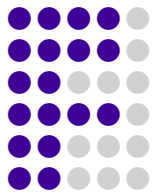

C++

Go

SQL

Cassandra CQL

Bash Linux

## LANGUAGES

English

French

## MY HOBBIES

Doing photography

Dancing

Playing guitar

Playing go
