## PROFILE

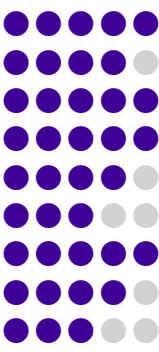

I am a very curious person who showed great skills on logic problems since my childhood along with a strong creativity. Amongst others, this made me start playing go, doing photography, dancing and playing guitar. I then developed a huge interest in IT and everything in its orbit which conducted me to an engineering school. Starting my career as a backend developer, I never ceased to go further in my job. Along with my technical skills, my curiosity, my commitment and my communication skills lead me to work as much as a tech lead as a technical architect in which I can share my technical knowledge and my thoughts about a bigger pictures.

## CORE PROFICIENCIES

Resilient   Curious   Creative  
Like to plan & leave nothing to chance

Software Development & Algorithms  
Strong knowledge in database, networks & OS  
Process & Tools definition  
International project teams coordination

Problem Solving  
IT architecture  
Software Development  
Data queries  
Convincing people  
Network & OS  
International projects  
Teams coordination  
Team management

## WORK EXPERIENCE

### Technical architect - AXA France

**Aubay**   📅 Feb 2019 – Ongoing   📍 Paris, France

- Define and document IT solutions on multiple major products, based on business needs and architectural context
- Expose and convince architectural and technical teams about IT chosen solutions
- Share my vision about IT governance topics and long term architectural choices

### Ops & Tech Lead - Euler Hermes

**Aubay**   📅 Jun 2017 – Jan 2019   📍 Paris, France   🌐 Working with international teams

- Ensured good health of 2 major worldwide websites and improved service quality by leading a dedicated workshop
- Made technical choices about platform evolution, and coordinated their set-up
- Set up reporting through data analysis for business and managing teams to present a clear service level overview and highlight improvements
- Discussed and defined new process and automatization tools, in the context of setting up agile methods

### Tech Lead - AXA Group solutions

**Capgemini**   📅 Jan 2015 – May 2017   📍 Paris, France   🌐 Working with international teams

- Analysed the software solution - newly bought to provide a new automated service to business - then defined and wrote documentation of target solution using feedback from business teams (from 6 countries)
- Been the leader on delivery and development subjects, from defining deliveries process and tools, to coordinating deployments and operations with international team (including a migration from on-premise to cloud)
- Set up of data requests and reporting to analyse use cases and help defining new business rules
- Defined with enterprise architect specifications for additional tools to complete the offer with efficient business solutions

## Web developer/Consultant

### Self Employed

📅 Nov 2014 – May 2016

📍 Paris, France

🌐 Working with international teams

- Gave technical advise and did web development, on my spare time, for small north american business (ex: breezing.com)

## Software engineer

### Capgemini

📅 Sept 2010 – Dec 2014

📍 Paris, France

🌐 Working with international teams

- Took care of optimization subjects on the platform and on environment evolution (set up of virtualization, servers and database administration)
- Did technical management of a french and indian team
- Wrote technical specifications and developed new features
- Worked on Software Engineer community core-team for Capgemini, to provide tools and information to the whole community

## Intern Developer

### C-S

📅 Feb 2010 – Jul 2010

📍 Paris, France

- Benchmarked virtualization tools and defined a technical solution to do automatic deployment and configuration of a software
- Developed the solution and provided it to a project which was initially using 8 bare-bone servers for their testing set
- Added a front-end for project users to be able to use it very easily

## EDUCATION

M.S. in Computer Science - additional classes in network, OS, security, AI

**ENSIIE - french high-ranking engineering school**

📅 Sept 2007 – Aug 2010

Preparatory class for top french engineering schools - Specialized in Mathematics and Physics

**Lycée Pierre de Fermat**

📅 Sept 2005 – June 2007

Certification: PH125.8x Data Science: Machine Learning

**HarvardX**

📅 Sept 2019 – Nov 2019

## CODING LANGUAGES & TOOLS

- **Professional usage:** Python, C++, SQL, Git, Linux
- **Proficient:** Javascript, ReactJS, Rust, Gitlab, Docker
- **Notions:** Go, Java, Shell Scripting, Cassandra, AWS, KVM

## WHAT I DO AT WORK
